

Activa Solar Cell Cleaning

Cleans solar cells, dissolves soot, pollen, bird droppings and protects against re-soiling.

Activa Solar Cell Cleaning is a specially adapted cleaning agent that quickly and easily solves the fallout that solar cells are exposed to, e.g. soot, air pollution and bird droppings. Contains active ingredients that dissolve easily and quickly the dirt and leaves behind a protection that prevents re-soiling.

Activa Solar Cell Cleaning is an environmentally friendly cleaning agent in recycled plastic bottles.

Instructions for use:

Mix with water in a solution of 5% (1 to 20). Apply the solution with e.g. sponge, cloth, mop or spray the solution. Leave on for 3-5 minutes and then rinse with clean water. Avoid cleaning the solar cells in sunlight as this can cause the solution to dry onto the surface. Also do not clean in too much heat as this also causes the solution to dry too quickly. The solar cells should be cool when cleaning is carried out.

Contains: <5% anionic surfactants, non-ionic surfactants.

For more information see safety data sheet.

Art.no. 32080 Activa Solar Cell Cleaning 2,5 L

pH value concentrate:	11,4
Sustainability:	At least 36 months
Package:	4 cans/carton

Safety Data Sheet

Apply the solution with e.g. sponge, cloth, mop or spray the solution. Leave on for 3-5 minutes and then rinse off with clean water.
